CGPA - 84%

PERSONAL PROJECTS

Weather & Time App

- **Real-time Weather Data:** Fetches and displays live weather details (temperature, humidity, wind speed, sunrise, sunset, and weather conditions) for any searched city using the OpenWeatherMap API.
- **Analog & Digital Clocks:** Shows both analog and digital clocks that update dynamically based on the selected city's local time zone.
- **Dynamic UI & Theming:** Background color changes based on the time of day (day, evening, or night), and temperature is visually highlighted using gradient text colors.

OffnBuy

- Built and deployed a responsive e-commerce deals website using React.js and Tailwind CSS.
- Enabled redirection to top platforms like Amazon and Flipkart with extra discount offers.
- Designed a clean, mobile-friendly UI to enhance user experience across all devices.
- Hosted the project on Netlify with optimized performance and fast loading times.

Future Developer - online Coaching platform

- A responsive educational website offering categorized courses for students.
- Features an interactive FAQ section and student testimonials using Swiper.js.
- Built with **HTML, CSS, and JavaScript**, ensuring a modern and user-friendly UI.
- Includes a responsive navigation menu for seamless browsing on all devices.
